

Clinical Pathology

Clinical pathology is an important branch of veterinary medicine. Better understanding of this subject helps to control the majority of routine and critical medical decisions, and is central to the advancement of scientific research. Considering the importance of clinical pathology in various fields such as clinical practice, referral or diagnostic laboratories, pharmacology industry, and research, the St. George's University School of Veterinary Medicine offers a program leading to the MSc degree in veterinary clinical pathology. This program focuses on basic and advanced levels of information in clinical pathology, accompanied by research, and deals with three major areas: hematology, biochemistry, and diagnostic cytology.
