

# The Preveterinary Club

The Preveterinary Club provides opportunities to gain basic knowledge and practical experience within the field of veterinary medicine for those with, and without, prior veterinary experience. We volunteer around the island to better the lives of animals in Grenada and the organizations who serve those animals. The club allows preveterinary students to get together both for fun and to address issues that affect us. We work with other clubs to make the preveterinary program more involved in the School of Veterinary Medicine.
