

Repeated Courses

Graduate courses may be repeated under the following circumstances: A course taken in which a student earned a grade of "F" may be repeated only once. Upon satisfactory completion, the credit and GPA of the first course will not be used to calculate the term nor cumulative GPA; only the grade from the course repetition will be utilized in the GPA calculation. Transcripts will reflect both the original and repeated course grades.

Courses that have been completed with a passing grade may not be repeated for the purpose of improving the grade. In the instance of the MD/MSc degree, the policy will apply to ALL courses that contribute to the MSc degree.
