

BUSI 300 : Business Placement

This internship is designed to provide the individuals with direct exposure to some component of the Grenadian business community. A management-level member of the company will serve as mentor to students, explaining different aspects of organizational functioning and decision-making to help students maximize what they learn. Precisely what responsibilities students assume within the organization will depend on the students' previous experiences and education. Students will, in conjunction with the mentor and a tutor from St. George's University, compile lists of learning objectives. Students will present a report to their faculty supervisor describing their learning experiences and evaluating their contributions. Students will make oral presentations to students and colleagues in the Business program.
