

Pre-Veterinary Medical Science Comprehensive Examination (PVSCE)

All students must take this examination at the conclusion of the final year of the Pre-Veterinary medical program. The examination is comprehensive for the final year of the Pre-Veterinary medical program.

If students fail the PVSCE, the Pre-Veterinary Committee for Satisfactory Academic Progress and Professional Standards will determine if students are:

- permitted to take a re-sit of the examination at the start of the next semester; or
- required to repeat coursework and take the PVSCE at the conclusion of the semester; or
- dismissed from the Pre-Veterinary Medical Program.
