

Pre-Registration Procedures

Students in professional programs will be automatically pre-registered for their required courses. Students enrolled in undergraduate or graduate programs are required to meet with their faculty advisors during the designated pre-registration period. Scheduled appointments are recommended.

After consultation with an Faculty Advisor, the advisor will submit students' official pre-registration forms. Students will be able to view and print their registration status and course schedule from their Student Self-Service account.

These procedures will be available prior to the pre-registration period.
