

# Associate Dean of Students – Clinical (Dean of Students Office)

There are two associate deans, one for the UK and one for the US. They report to the dean of students. The associate dean of students US/UK meets with any clinical student that has questions about policies and procedures within the school of medicine, as well as any non-academic concerns/issues. They advise on Leave of Absences, exam excuses, the process for appeals through CAPPs, academic timeline, professionalism issues and general advice for other concerns such as financial, medical, and personal.
