

SCSK 522 : International Spanish Experience

This one-credit selective allows students to build and expand on medical Spanish language skills by participating in hands-on patient interaction in health care settings located in international settings. The course director assists with the identification and selection of a program that best meets student needs from a large variety of approved options available to them. All international programs have some degree of Spanish language immersion and practice opportunities throughout the selective. Settings will primarily focus on students applying those skills to patient interviews and basic medical care in clinics and hospital settings, participating in community health initiatives.
