

Food and Housing

All clinical centers and affiliated hospitals provide information about access to food and housing. Food and housing vary from site to site but remain the student's responsibility. Information about hospitals' housing, parking permits, meal tickets and similar local issues are provided by the hospital's Medical Education Coordinators who assist SGU students at clinical centers and affiliated hospitals. A listing of hospitals offering meal tickets and parking permits can be found on the official clinical website. Departing students and the student coordinators at each hospital provide listings of available housing, which is helpful to the students. Students are responsible for their own transportation to and from their hospital.
