

LAMS 539 : Production Animal and Medicine Surgery

This course is aimed at students with an interest in production animal medicine. The goal is to expose students to relevant topics in more depth and give them the opportunity to have some hands-on experience to learn common skills in the field.

The course is taught through a combination of group discussions, wet labs, role play and case studies. They will be required to present a case study in a small group as well as show professional behavior throughout the course.
